1. ABOUT NDE FORCOB Architects

We have a sound depth of experience within the Cameroonian built environment.

BACKGROUND

The founder Nde Forcob setup **NDE FORCOB Architects (NFA)** in August 2016. Since its creation NFA has been engaged on several residential projects for private clients, schools and restaurants. The office recently completed the design and site supervision for construction works to two new residential buildings at Ngoulmekong Maetur site.

Currently NFA is involved in the supervision of a G+7 interior fit-out of an office building for IOM in Yaounde.

Open-plan office for collaborative environment

2. OUR SERVICES

NFA offers services in Design and Project Management

DESIGN PHASE

We offer Architectural Design for new builds and refurbishments. Our architectural services are divided into the following phases of work:

STAGE 0: Strategic definition

(Assist in elaborating strategic brief)

STAGE 1: Preliminary Studies

(Site Visit, develop project brief and programme)

STAGE 2: Concept Design

(Architectural design, cost information)

STAGE 3: Developed Design

(developed design & application for building permits)

STAGE 4: Detailed Design

(Technical detailing, tender procedure)

CONSTRUCTION PHASE

Due to the need for your project to be done properly and within budget, we provide contract administration which is divided into the following

STAGE 5: Construction

(Site Visits, quality control, billing , weekly reports)

STAGE 6: Handover and Close Out

(Assist in resolution of defects post-construction)

Renovation of office building at Mimboman (February 2022)

3. WORKING ON YOUR PROJECT

With each commission it is NFA's philosophy to listen, brainstorm and collaborate with the project owners from the onset and to deliver best outcomes to match the project brief.

We are committed to bring the following values to projects:

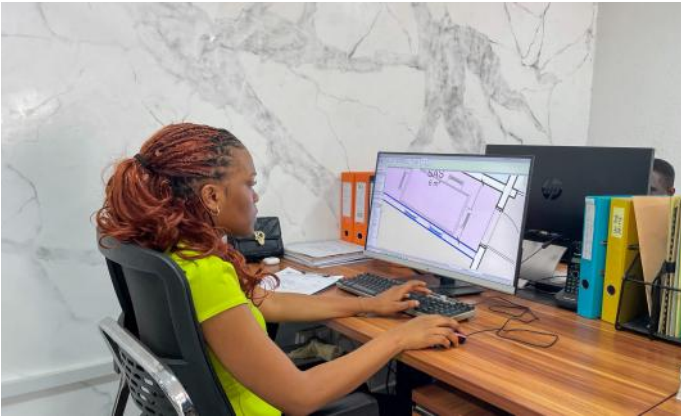

- Belief that participation of the client and continuous consultation forms an essential part of the design process
- Design and production drawings based on Computer Aided Design (CAD)
- Provide flexibility in the delivery of the final product to meet the clients immediate and future needs (such as phasing and programming for future expansions)
- To respect the immediate environment and context within which project located.
- Offer continuous support and consultancy services during the maturation of the project onsite.

Secondary and Primary School Complex at Lendi, Douala (August 2024)

4. TECHNOLOGY AND DESIGN OUTCOMES

NFA has been an 'early adopter' of computer aided design (CAD) software. Our projects are organised in 3D beginning from the topographical survey to final sheets for printing. This has permitted great efficiencies throughout the design and production phase.

Our PC's are inter-connected to an office server and we use Microsoft 365 SharePoint/OneDrive and Teams platform for collaboration and file sharing.

We also use CAD software to create high resolution rendered images.

The office is also equipped with the following:

- 7 desktop computers & 27 inch screens
- 1 wide format A0 TM-300 Canon plotter
- 1 all-in-one A4 HP LaserJet printer
- 1 A3 format Canon image runner C3225i
- Microsoft 365 Business Standard Licenses

At NFA our equipment permits us to streamline work and manage productivity of Hard-copy documents on-premises.

5. OUR TEAM

The office is mix of dynamic young professionals who offer a range of competences.

MINTA BAFRI

Associate Director

Minta is the office's project coordinator and oversees the timely programming and delivery of existing and new projects. She holds a master's degree from the Institute of Fine Arts Campus at Fouban.

CURRENT PROJECTS CON'T:

August 2023

IOM CANVAC OFFICES

NFA was selected to do the interior design and layout of the new IOM CANVAC offices on the ground floor at Rue Cepper Djoungolo, Yaounde. The design included Bioboosts, waiting areas, back offices and new toilet design and layout.

Completion date for October 2025

6. RELEVANT EXPERIENCE

CURRENT PROJECTS:

December 2023

PRIMARY AND SECONDARY SCHOOL, LENDI, DOUALA

This G+4 with basement building is to serve as a primary and secondary school complex. It has an administrative building linking two buildings through a system of 'bridges'. The construction began in 2023 and is scheduled for completion in 2026 academic year.

Completion date for June 2026

PREVIOUS PROJECTS:

December 2022

AFRILAND FIRST BANK OFFICES, HIPPODROME,

This G+1 with basement building underwent renovation as it previously housed the Zenith Insurance company. It will consist of 4 distinct zones each having open plan working spaces, small meeting rooms and two offices. The basement has a similar configuration.

PREVIOUS PROJECTS:

JANUARY 2021

JFN CO-TRAINING CENTER, PROVINCE-YAOUNDE

Nde Forcob Architects was approached to propose solutions to convert an existing single storey building into a multi-use co-working and seminar spaces. The ground floor consists of offices, meeting room and canteen. The basement has residential units of single bedrooms for visitors.

Construction works completed in 2020.

PREVIOUS PROJECTS:

JUNE 2018

JFN INSTITUTE OF TECHNOLOGY, BONAMO USSADI,
DLA

Nde Forcob Architects was in collaboration with **Arinskeem Ltd** who were acting both as lead consultants and project managing. The complex consists of; Administrative, 3 Pedagogic, amphitheater, Startup, Hi-Tech, student Centre, residences for professors and students, sports centre and restaurant/conference blocks.

PREVIOUS PROJECTS:

SEPTEMBER 2017

SUSHI RESTAURANT, BASTOS, YAOUNDE

The design aimed to address the need to have a modern restaurant with indoor and outdoor spaces which customers can choose from depending on the occasions. There is an external pool area, VIP booths, sushi take-away, offices, bar and kitchen.

The construction work is in its final phase of finishes. Opens in 2018.

PREVIOUS PROJECTS:

JUNE - SEPTEMBER 2017

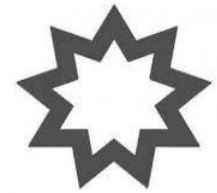

PRIMARY SCHOOL, NYLON, YAOUNDE

This new primary school was designed to serve as an extension to the existing nursery school adjacent to the site. It provides 10 new classrooms ranging from CP to CM of the francophone educational system. Two new buildings along with a refurbished single storey building would serve as teaching classrooms, canteen, offices and sickbay.
